Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121.

I. Claims 1-15, drawn to apparatus of a skylight classified in class 52, subclass 200.

II. Claims 16-22, drawn to method of forming a skylight, classified in class 29.

The inventions I and II are related as process of making and product made. The inventions are distinct if either of the following can be shown:

(1) that the process as claimed can be used to make other and materially different product or

(2) that the product as claimed can be made by another and materially different process.

For instant case, the apparatus claims could be made by a method different than that group I such as having a transparent panel housed in a frame, which including four frame members. The frame members having a plurality of fastener means to secure onto a roof portion.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purpose as indicated is proper.
